# Tagging content with Custom Metadata

Updated 6 days ago

Inspera Assessment

This functionality is available for **Authors**.

Only Custom Metadata that has been created at the tenant level by a Custom Metadata Manager (see article [2](#)) and then made available by an Item Bank Manager (see article [2](#)) will be visible to Authors.

## How to tag content

### 1. Select the content to tag

From the Question or Question Set list view, select which content you wish to tag.

| Questions                           |                         |            |               |                     |               | 2                   | ▼            | Create New     |             |        |        |
|-------------------------------------|-------------------------|------------|---------------|---------------------|---------------|---------------------|--------------|----------------|-------------|--------|--------|
| <input type="text"/> Search         |                         |            |               |                     |               | Created by me       | Edited today | Shared with me | Filters ▾ 0 | Filter | Export |
| <input type="checkbox"/>            | Title                   | Type       | Created by    | Last edited         | Edited by     | Created             |              |                |             |        |        |
| <input type="checkbox"/>            | Second Example Question | Text Entry | Fergus Fergus | 01.09.2025 12:27 PM | Fergus Fergus | 01.09.2025 12:27 PM |              |                |             |        |        |
| <input checked="" type="checkbox"/> | Example Question        | Text Entry | Fergus Fergus | 01.09.2025 12:27 PM | Fergus Fergus | 01.09.2025 12:26 PM |              |                |             |        |        |

In the bottom action panel click 'Edit Custom Metadata'

[Edit Custom Metadata](#)

**Please note:** If you select multiple questions or question sets, you won't be able to see their existing Custom Metadata. Any new tags you apply will be made in bulk and will overwrite any current values for those fields.

### 2. Tagging using single-select or multi-select values

Within the modal, find the relevant field and then select the value (for single-select) or values (multi-select) that you wish to tag against the content. Click 'Update' to save.

Review Date

Start date:

dd/mm/yyyy

September 2025

| Mo | Tu | We       | Th | Fr | Sa | Su |
|----|----|----------|----|----|----|----|
| 1  | 2  | <b>3</b> | 4  | 5  | 6  | 7  |
| 8  | 9  | 10       | 11 | 12 | 13 | 14 |
| 15 | 16 | 17       | 18 | 19 | 20 | 21 |
| 22 | 23 | 24       | 25 | 26 | 27 | 28 |
| 29 | 30 | 1        | 2  | 3  | 4  | 5  |
| 6  | 7  | 8        | 9  | 10 | 11 | 12 |

## 5. Tagging multiple content items

Choose your intended field and then select or define which values to add. The changes to apply will be shown at the bottom of the modal.

### Edit Custom Metadata - 3 questions

Custom field

Review Date

Start date:

14/12/2025

### Changes to apply

| Questions         | Tagged Value(s) |
|-------------------|-----------------|
| Contemporary Jazz | 2025-12-14      |
| Folk              | 2025-12-14      |
| Classical         | 2025-12-14      |

For multi-select values, you will also be able to choose any values you wish to remove from the content items:
